#### Administrative Retreat

Our first summer administrative team retreat day was held on June 27<sup>th</sup>. In addition to a review of district data and discussion of our needs in terms of ongoing goal areas, we engaged in several hours of professional development provided by an associate from our data warehousing system. Administrators had the opportunity to try out many different reporting options, and to consider the easiest, most productive ways to arrange complex visual information. Our next professional development session will take place on July 31<sup>st</sup> when we meet with John Almarode to support our ongoing professional development with staff related to learning intentions.
